

Holistic Web Protection

- Is internet for your students filtered by AI in real time?
- Are you monitoring student mental health?
- Are your teachers in charge of their virtual classrooms?
- Are you protecting student online data privacy?

The only real-time AI web filter

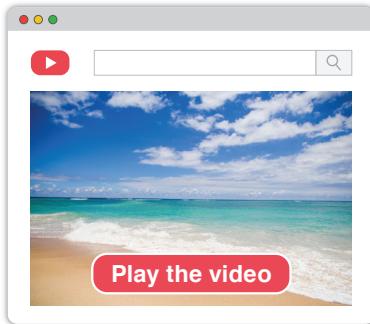

Our Artificial Intelligence web filter is recognized as a Cool Tool Finalist by EdTech Digest in 2020. Our AI filter sees what your students see.

AI that reads like you do

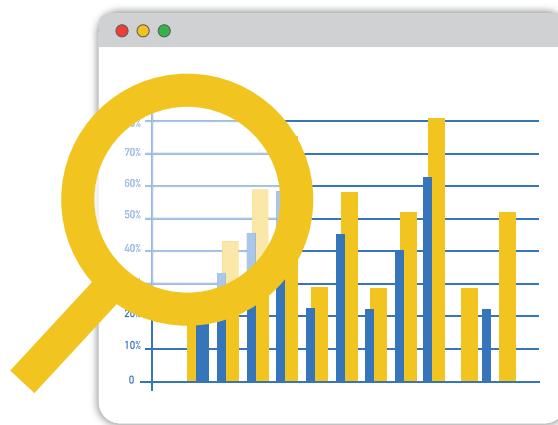

Perfect for distance and hybrid learning

Filter on and off campus to stay CIPA-compliant on any device or operating system. Deledao Education is perfect for keeping students on task in any type of learning environment.

Filter on and off campus to stay CIPA-compliant.

Measure student engagement

Advanced classroom management!

- Live monitoring of student screens
- Send students messages
- Lock down tabs or close tabs for students
- Import Google Classroom rosters
- Push websites to students and more

66

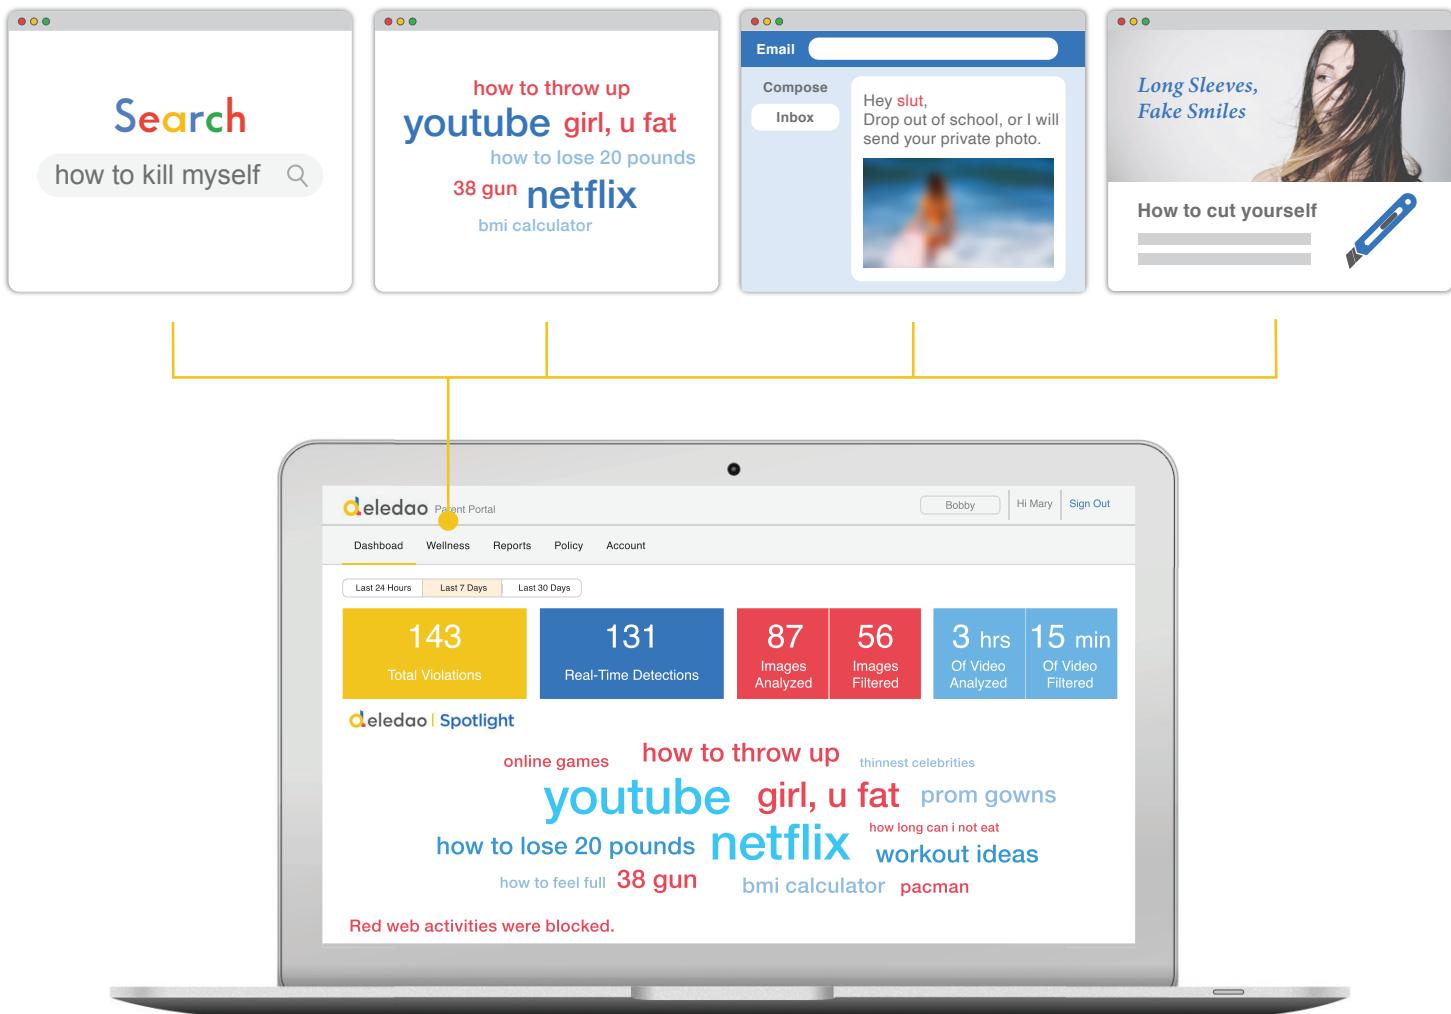

We are charged with the well-being of students so we decided to use Deledao to monitor their mental well-being. The reporting is very good and lets us know when children are considering self-harm or if there is cyberbullying activity. Now we can get them the help they need. Our school principal is very happy with the product.

Monitor mental well-being

Deledao's AI can pick up on the warning signs so you can get them the help they need.

The diagram illustrates the Deledao AI monitoring system. At the bottom is a laptop displaying the 'Deledao Parent Portal' with various statistics and a 'Deledao Spotlight' section. Four arrows point from four smaller device screens (a smartphone, a tablet, a laptop, and a desktop) up to the laptop, each showing different types of monitored content.

Smartphone (Left): Shows a search bar with the query 'how to kill myself'.

Tablet (Second from Left): Shows a search results page with queries like 'how to throw up', 'youtube girl, u fat', 'how to lose 20 pounds', '38 gun', 'netflix', and 'bmi calculator'.

Laptop (Second from Right): Shows an email inbox with a message from 'Hey slut,' threatening to drop out of school if not sent a private photo.

Desktop (Right): Shows a photo of a person with the caption 'Long Sleeves, Fake Smiles' and a link 'How to cut yourself'.

“ As a district with over 11,000 students, we wanted a few things. One, a content filter that finally works on our Windows devices, not just on Chromebooks. Second, a solution that works off campus for distance learning. Deledao delivered on all its promises and more. It's probably the best thing we bought this entire year.
